### 1. Framework

The Rector of Universidade Católica Portuguesa, Prof. Dr. Isabel Capelo Gil, hereby announces the opening of an international call for applications for one vacancy of junior doctoral researcher to perform duties of scientific research and knowledge transfer (with an exclusivity clause), in the scientific field of microbiology. The research activities will be carried out at the Centre for Biotechnology and Fine Chemistry (CBQF), integrated at the Faculty of Biotechnology of Universidade Católica Portuguesa, in Porto, within the framework of the PopGenListeria - Population Genomics of the Foodborne Pathogen *Listeria monocytogenes* in the Context of Food Safety and the "One Health" Initiative , funded by ERDF – Innovation and Digital Transition Programme (COMPETE2030-FEDER-00821800).

The "PopGenListeria" project aims to elucidate the genomic dynamics of *Listeria monocytogenes* populations to understand the underlying mechanisms of their persistence in food processing environments (FPE) and assess the associated risks to human health. The selected researcher will participate in a multidisciplinary study involving genomics, bioinformatics, and microbiology. Key activities include:

- Experimental Evolution Studies: conducting laboratory assays simulating FPE conditions (exposure to disinfectants, acid, temperature) to analyze the adaptation and evolution of *L. monocytogenes* populations and validate genetic targets.
- Epidemiological and Genomic Analysis: analyzing genomes from real-world FPE samples (pre- and post-disinfection) and from primary production sources (e.g., dairy farms) to map transmission routes and virulence profiles.
- Data Management and Dissemination.
