Refª Sinfonia -02708800– BI- 9

[Portuguese version](#)

A call for tenders is now open for the attribution of one Research Scholarship within the scope of the Project “SINFONIA - Sustainable Agroecosystems, Food Innovation, and Artistic Practices for Climate Adaptation.” financed by the European Union (FEDER), through the Northern Regional Programme (Norte 2030), under the following conditions, set out below.

Scientific area: Biotechnology and Nutritional Sciences.

Admission requirements:

General requirements:

Candidates for the research grant must hold a master’s degree in biotechnology and Innovation or related fields.

Specific requirements:

Candidates must also have knowledge/research experience in the following areas: Microbiology, food development, nutritional and functional characterization of foods and ingredients with a particular focus on dietary fiber.

Preferred Factors:

Will be considered preferred factors: Experience with standard methodologies for proximal characterization (preference for AOAC methods), NREL methodology for fiber analysis, bioactives extraction and characterization as well as the technological characterization of materials (e.g. water absorption, oil absorption solubility). Experience in the development of active coatings, antimicrobials and statistical analysis will also be considered.

Candidates for the Research scholarship must also be enrolled or commit to enrolling in a course that does not lead to an academic degree that promotes the consolidation of their scientific training¹.

Work Plan:

The Research Fellow will participate in the following project tasks, namely:

- Compositional and functional characterization of lignocellulosic biomass co-products derived from crop residues
- Assessment of the antioxidant and antimicrobial potential of lignin fractions.
- Development and testing of bio-based materials, incorporating extracted polymers, as well as the characterization of their mechanical, structural, and functional properties.
- Nutritional and functional characterization of food products obtained from crop systems established using bioinoculants, with the aim of establishing relationships between nutritional composition and potential applications for biomass valorisation.

Applicable legislation and regulations:

- Statute of the Scientific Research Fellow: <https://dre.pt/web/guest/legislacao-consolidada/-/lc/58216179/view?w=2019-08-28>;
