

Post-doctoral research grant (BIPD)

Refª (POCI-01-0247-FEDER-069858_BI_2)

[Portuguese version](#)

A call for tenders is now open for the attribution of one post-doctoral research grant (BIPD) within the scope of the project **BioProtect - Desenvolvimento de material de embalagem biodegradável com propriedades ativas para conservação de alimentos (BioProtect – Development of packaging material biodegradable with active properties for food preservation)**, co-financed by the European Regional Development Fund (FEDER) through the Competitiveness and Internationalization Operational Program (POCI) under the following conditions:

Scientific area: Materials and Packaging

Admission Requirements: The postdoctoral research grant can be awarded only if the following requirements are cumulatively met:

- a) PhD degree obtained in the three years before the start date of the grant.
- b) The post-doctoral research will be carried out in a host entity other than the one in which the research work leading to the award of the PhD degree was carried out.
- c) The grant holder does not exceed, with the celebration of the grant contract in question, including possible renewals, an accumulated period of three years in this fellowship type, followed or interpolated.

In addition to the above-referenced requirements, candidates for the research grant must have a PhD in the scientific area of Chemical Engineering, Polymer Engineering, Materials Engineering, Biotechnology, Chemistry or similar.

Candidates must have a good command of the English language and have research experience. As preference factors the experience in processing and application of biomaterials and films and coatings development and biodegradation, will be considered.

Work plan: The activity to be carried out by the scholarship holder integrates a research project whose main objective is to develop a recyclable and biodegradable biomaterial. The material will be produced with specific functional agents to improve gas and moisture barrier properties and mechanical properties compared to current materials, and to give an active role in preserving perishable foods. The Research Fellow will participate in all project tasks, from the development of the biomaterial, tests and studies of its performance as a packaging.
