- Knowledge of Excel, R, SPSS or equivalent tools;
- Participation in research projects, internships, publications or scientific communications;
- Strong academic performance and/or merit distinctions.

Candidates for the Research scholarship must also be enrolled or commit to enrolling in a course that does not lead to an academic degree that promotes the consolidation of their scientific training<sup>1</sup>.

### **Work Plan:**

The research grant holder will join the team at the Universidade Católica Portuguesa within the scope of the BEIRALMA project, collaborating in research activities focused on the valorization of agri food by-products, namely grape pomace and olive pomace, with the aim of developing functional ingredients and plant-based food matrices. The activities to be carried out include the preparation, organization and handling of samples, ingredients and formulations, as well as support for the microbiological characterization of ingredients and food matrices. The grant holder will participate in the execution of microbiological assays, including the evaluation of antimicrobial activity, and will support the study of fermentation processes. Whenever applicable, support will also be provided for in vitro bioactivity and/or safety assays. This will also include the processing, analysis and interpretation of experimental data, as well as support in the preparation of reports, presentations and scientific communications. The aim of the grant is to support the microbiological and functional characterization of the developed ingredients and formulations, contributing to the development of more sustainable and safe plant-based food products aligned with the principles of the circular economy and the clean label concept.

### **Applicable legislation and regulations:**
